BookletChart™

nauticalcharts.noaa.gov/charts/noaa-raster-charts.html#booklet-charts

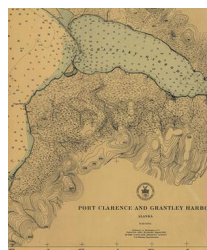

Nautical charts in booklet form, downloadable for printing from home computers.

U.S. Coast Pilot®

nauticalcharts.noaa.gov/publications/coast-pilot/index.html

A nine-volume book series of sailing directions that supplement nautical charts. Each volume covers a separate geographical region, and contains navigation regulations, facility locations, and weather information.

Historical map & chart collection

historicalcharts.noaa.gov

More than 35,000 images—covering offshore and onshore sites—includes some of the nation's earliest nautical charts, bathymetric maps, city plans, and Civil War maps.

U.S. Chart No. 1

nauticalcharts.noaa.gov/publications/us-chart-1.html

Guide for understanding the symbols, abbreviations, and terms used on nautical charts.

Need forecasts and water levels?

nowCOAST

nowcoast.noaa.gov

Web mapping portal to real-time coastal observations and NOAA forecasts.

Help keep our charts up-to-date

NOAA hydrographers use the most advanced technology to survey our coasts, acquiring the data necessary to update the nation's navigational charts. Coast Survey is also using information acquired from satellites to detect charting problems. One of our best sources of information, however, are the millions of boaters using nautical charts. If you see a discrepancy between what is on the chart, and what you see on the water, let us know!

WRONG INFO ON A CHART?

Report discrepancies!

NOAA Office of Coast Survey is the nation's nautical chartmaker. Originally formed by President Thomas Jefferson in 1807, Coast Survey updates charts, surveys the coastal seafloor, responds to maritime emergencies, and searches for underwater obstructions that pose a danger to navigation.
